

Town-center development in Appenzell

Cantonal officials and local stakeholders have embraced a holistic development concept for the Appenzell town center. The aim of the concept is to help secure the town's medium and long-term development while preserving its aesthetic appeal. EBP has been commissioned by the canton to examine the various factors involved, including traffic, townscape design, spatial planning, tourism, cultural venues, and economic issues as a basis for a comprehensive vision for the town center collaboration with local residents.

Our services

- Analysis of the current situation in the town center
- Ascertainment of the needs and expectations of various stakeholders
- Development of a broadly supported project vision, presentation of specific development proposals, and drafting of an implementation plan
- Moderation of three workshops in consultation with local stakeholders
- Development and implementation of public-participation events
