

Climate Adaptation Workshop for Companies

We design and moderate workshops for companies on the topic of climate adaptation. The customized content provides companies with an overview of the expected effects of climate change as well as the resulting threats and opportunities for the company. We point out possible fields of actions and develop appropriate measures. This enables them to minimize risks and exploit opportunities.

Our services

- Designing and moderating a half-day workshop
- Creating a matrix showing company-specific risks and opportunities
- Identification of the individual need for action
- Development of tailor-made measures
