

Evaluation of the PEIK Energy Consulting Service

On behalf of the Swiss Federal Office of Energy, we evaluated the energy consulting service made available to small and mid-sized companies in Switzerland under a federal program known as EnergieSchweiz. Our evaluation of the program, which is referred to by the acronym PEIK, included an assessment of the following: program concept, goals achievement, overall effectiveness, efficiency of resource allocation, marketing and communication. We used our findings to derive recommendations for improving PEIK.

Our services

- Document analysis and desk research
- Conducting guided interviews
- Facilitating workshops
- Summarizing the findings
- Drafting of recommendations

Client

Swiss Federal Office of Energy (SFOE)

Facts

Period 2021 - 2022
