

Process Support for Redevelopment of Buchrain Town Center

The "Intergeneration Project" aims to gradually create a lively village center in the municipality of Buchrain. With this in mind, the municipality and project partner, Eberli AG, completed a study of development alternatives. The winning project now moves to the next project phase: development of the indicative project in greater detail and the creation of a development plan. We are providing procedural support to the project partners during this phase.

Our services

- Providing project and process management
- Preparing, moderating and taking minutes of meetings with project partners
- Drafting of specifications for the required expert opinions
- Calculating the project planning credit
- Consulting with planning law issues
