Carbon-Offset consulting

Ever more companies are setting ambitious climate goals and investing in offset projects to compensate for their unavoidable greenhouse gas emissions. On behalf of our private-sector clients, we evaluate offset projects in terms of their quality, credibility and reputation to ensure that long-term offset strategies meet our clients' highest expectations.

Our services

- Evaluation of offset projects in terms of quality and reputation in accordance with proven criteria for offset projects
- Drafting of investment recommendations
- Provision of support when addressing company-specific issues related to offsetting (e.g. regarding showcase projects and project development)
- Consultation pertaining to the implementation of long-term offset strategies in consideration of possible developments (e.g. regarding corresponding adjustments)
