

Solar battery market study

When purchasing photovoltaic systems, private owners are increasingly opting for solar batteries for their homes. While only around 100 solar batteries were sold in Switzerland in 2015, the figure had already risen to 1,500 in 2019. In light of this growing interest, EnergieSchweiz commissioned us to conduct a market study on solar batteries for private customers.

Our services

- Providing an overview of the Swiss stakeholders in research, development, and production who are shaping the market
- Identifying current and future technologies
- Analyzing the raw materials used and their limitations
- Presenting the life cycle assessment of a solar battery
- Surveying current market prices
- Calculating the cost effectiveness of solar batteries
- Surveying consumer motivation behind purchases

Client

Market study: Solar Batteries for Homeowners

Facts

Period	2019 - 2020
Project Country	Switzerland
